

Can I use SpyOFF on multiple devices?

Your online security is our main concern, which is why you may use SpyOFF not only on one device but on all your devices that support SpyOFF! SpyOFF supports the connectivity to limitless devices and may be used simultaneously.

You need either Windows 7 or a more recent version, Android, Mac OS X, iOS, Windows Mobile, Linux or a router (such as DD-WRT / Tomato).

Please note that all access data you receive need to be treated confidentially at all times and kept safe from third-party access. Passing on your data to third parties violates our terms and conditions and can lead to the blocking of your account.
