

Can I use SpyOFF on Apple TV?

We have not received any confirmation about a possible direct installation on Apple TV.

We recommend installing the VPN via the router in order to connect all your devices on the network to SpyOFF.

[Setup Guide for DD-WRT routers](#)

Please note that not all routers offer VPN support. Make sure your router is not working as a modem and does support the use of open VPN and PPTP. (Setting for PPTP-Passthrough in your router-menu)

We are working on a corresponding guide for Apple TV.

SpyOFF Support
