

How do i set up a Graphical OpenVPN Client on Linux?

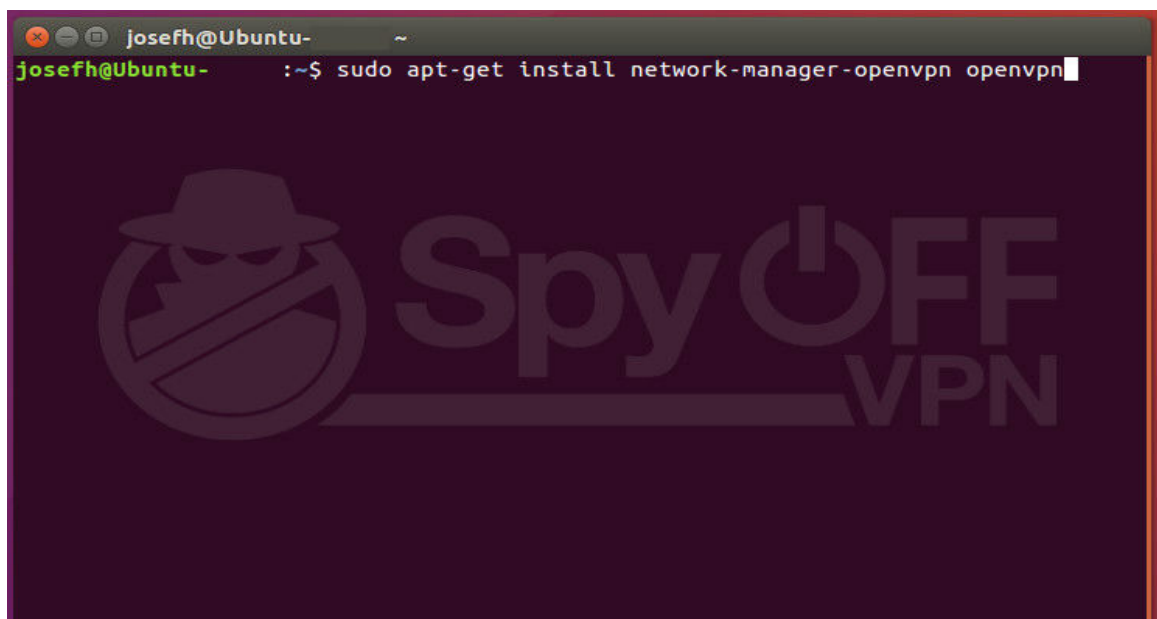

This tutorial describes how to create a graphical user interface for your SpyOFF OpenVPN client.

Perequisite for this tutorial is, that you hve already configured your SpyOFF OPENVPN server. A tutorial can be found [here](#).

Step 1: Install Network Manager:

First we install the network manager. for this we enter the following command:

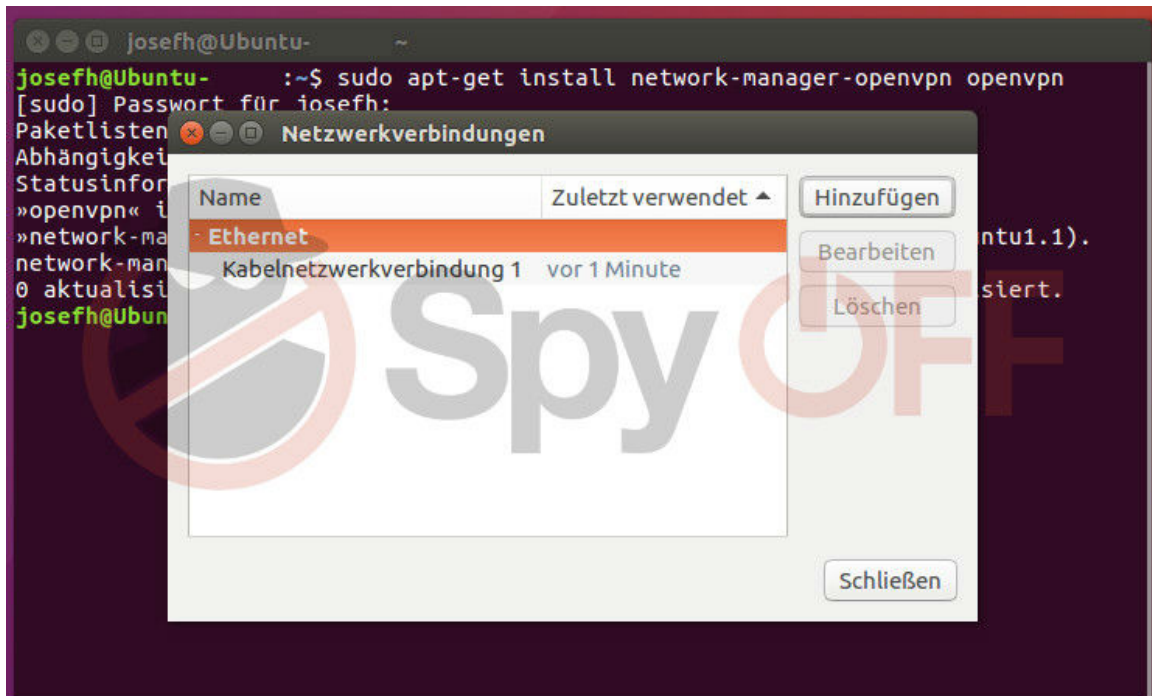

```
udo apt-get install  
network-manager-openvpn-gnome
```
